Objective:

Result-driven Front-End Developer with more than six years of experience in creating and implementing innovative web products and user experiences. Proficient in React, Redux, React Context API, Rest API, JavaScript, jQuery HTML, CSS, Sass, etc. Adept at collaborating with cross-functional teams to drive project success. Seeking an opportunity to contribute my skills and expertise to a dynamic development team.

Professional Experience:

Front End Developer   05/06/2017 - Current
Ondicom – North Sydney

- Developed responsive web apps using HTML5, CSS3, Sass, React.js and JavaScript that meets the business and user goals.
- Created web products such as CRM, CMS, ROI sites, email templates, banners, landing pages, etc.
- Understood design layout from the UX team and converted into web projects from PSD, Sketch and Figma.
- Implemented new features and functionality to enhance user experience and improve site performance.
- Continuous maintenance and upgrade of clients' old site.
- Maintained active conversation with clients to ensure the site met its needs.
- Maintained client websites on an ongoing basis.

Web Developer Intern   01/2017 - 05/2017
Thinkun – Newtown, Sydney

- Worked closely with clients to understand project requirements and deliver high-quality web solutions.
- Developed custom WordPress themes and plugins to meet client specifications.
- Maintained proper documentation of processes and updates of projects using confluence.
- Developed various JavaScript functional prototypes like shadowboxes, slider carousels, tickers, event calendar filters, language switcher etc. for code reusability.

Technical Skills:

- Main Stack: React.js, JavaScript, jQuery, HTML, CSS, SASS,
- State Management Tools: Redux, React Context
